Summary

Aspiring Data Engineer skilled in Python, Pandas, PostgreSQL, PySpark, Airflow, and AWS, with hands-on experience in ETL pipelines, data warehousing, and analytics projects.

Skills

- **Data Engineering:** Python, SQL, PostgreSQL, PySpark, Apache Airflow, ETL Pipelines, Data Modeling
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Cloud & Infrastructure:** AWS (Basics), Azure (Basics), Linux, Servers
- **Web & Backend:** JavaScript, Node JS, HTML, CSS, ReactJS, Redux Toolkit
- **Tools:** Git, GitHub, VS Code, Postman, pgAdmin4

Education

- | | |
|--|----------------------|
| Maharshi Dayanand University , Bachelor of Computer Application | Sept 2021 – May 2024 |
| • GPA: 7.4/10.00 | |
| School Of Excellence , Intermediate Schooling | July 2020 – May 2021 |
| • Percentage: 86.4 % | |
| Raj Modern School , High Schooling | May 2018 – May 2019 |
| • Percentage: 72.8 % | |

Experience

- | | |
|--|-------------------------|
| Systems Engineer , Tata Consultancy Services (TCS) | December 2024 – Present |
| • Worked in an enterprise IT and network environment handling user, system, and incident-related operational data. | |
| • Performed data analysis using SQL queries on structured datasets for issue tracking and reporting. | |
| • Gained hands-on exposure to Azure environment, server infrastructure, and network troubleshooting. | |
| • Developed strong understanding of data reliability, availability, and performance in production systems. | |

Projects

- | | |
|--|-------------|
| Retail Data Warehouse & Analytics Pipeline | Github Repo |
| • Built an end-to-end data pipeline using Medallion Architecture (Bronze, Silver, Gold). | |
| • Developed ETL workflows, data validation checks, and a PostgreSQL Star Schema warehouse. | |
| • Automated ingestion, transformation, analytics, and reporting with Apache Airflow. | |
| • Tech Stack: Python, Pandas, NumPy, PostgreSQL, PySpark, Airflow, SQL, Git, Matplotlib | |
| Sales Data Warehouse & Analytics System | Github Repo |
| • Designed Star Schema data warehouse using PostgreSQL. | |
| • Built ETL pipeline using Python, Pandas, NumPy. | |
| • Developed advanced SQL analytics with window functions. | |
| • Created CLI system for automated KPI reporting. | |
| • Tech Stack: Python, PostgreSQL, Pandas | |

Achievements And Awards

- Secured First Place in a Web Development Hackathon by delivering a working solution under strict time constraints, demonstrating strong problem-solving and rapid prototyping skills.
- Secured Second Place in a Code Debugging Competition by identifying and fixing logical and syntax errors, showcasing strong analytical thinking and debugging ability.
